

# EYFS Weekly Challenge

What is a Mosque? What do you do at a Mosque?

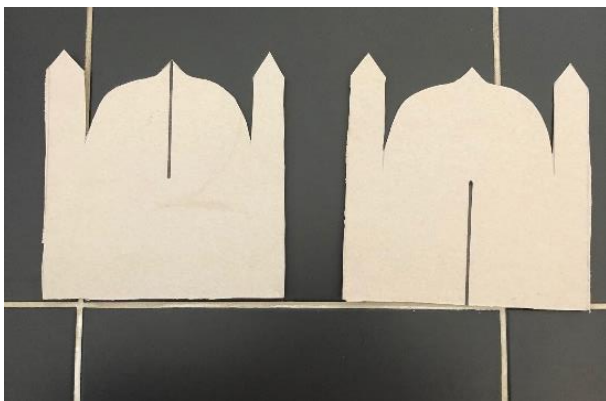

What is Ramadan? Can you find out more on how Ramadan is celebrated?

Hi Everyone, I hope you are all safe and well and have settled into a good routine at home. I know some of you are celebrating the month of Ramadan with your families and would usually go to the mosque but just like schools Mosques are closed too. This week I have set our weekly challenge to build our own 3D Mosque from a cereal box! You can use any boxes or materials from around your house. Why not have a look on the internet with your parents to look at different Mosques or other religious buildings - what different shapes can you see in the buildings? Have a great week and please do share photos of your wonderful 3D models!

## First

- First get an empty cereal box.
- Carefully open the cardboard box, so it is nice and flat.
- Draw an outline of a mosque on half of the cereal box, try and make it as big as you can.

## Next

- Carefully using a pair of scissors cut it out.
- Use the mosque you have drawn to trace the mosque on the other half of the cereal box and cut it out.
- Make a cut on the centre of the mosque dome, one cut on the top and the another cut at the bottom, try and make the lengths the same.

## Then

- Decorate your mosque- be as creative as you can!
- Finally fit the two cuts you made earlier onto each other to create a 3D effect and there you have it your very own 3D mosque!
- What other 3D models can you make?
- Can you use the internet with your parents/carers to look for more information on Mosques and the month of Ramadan?
